AREA OF EXPERTISE

Non-Surgical Facial Rejuvenation, Cosmetic Dermatology

DR DARIKA DE BACQ ROSE (MB CHB (HONS) MRCP)

Dr Rose trained in hospital medicine and dermatology before focusing on her aesthetic practice, from which it is clear she draws much pleasure. Patients value her honest, straightforward approach, gentle manner and meticulous attention to detail. "I believe the first consultation is so important. I like to really take the time to listen – beauty is such a personal thing and if I am able to see exactly what my patient hopes to accomplish and they fully understand the treatments I offer, together we can achieve the best results."

Treatments include injectables to soften facial lines, enhance lips, sculpt and restore facial volume, as well as address the often neglected neck, décolletage and hands. Dr Rose is the first doctor in the North of England to be trained in using Enerpeel®, an innovative range of chemical peels using advanced technology to deliver excellent, clinically proven results.

"I was so impressed by the research data presented at dermatology conferences over the last few years, I was keen to be able to offer my patients this range as soon as it planned to launch in the UK. The key is in their sophisticated carrier solution which increases skin penetration of the active ingredients, so you get fantastic results but much less in the way of redness and skin shedding usually associated with chemical peels. With Enerpeel EL®, for example, I can specifically target the delicate and previously avoided eye and lip areas."

Dr Rose aims to provide the highest level of care, safety and expertise in a tranquil and luxurious clinical setting. She takes pride in ensuring treatment is as relaxed and comfortable as possible, ideal for those who may be anxious or new to facial rejuvenation. "Once we have decided on how to achieve our goals, I see my patients regularly. I want them to look forward to their time spent with me in the clinical spa and I know they trust me to do my very best for them."
